

Brainstorming & Idea Prioritization Template

Date	04 July 2026
Team ID	
Project Name	Rising Water
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Kalluri Renuka	Develop a machine learning model to predict flood risk using historical weather and flood data.	Machine Learning	G1
2	Bharath Chandra Yamarthi	Develop a Flask web application for flood prediction and result visualization.	Web Development	G1
3	P. Harshvardhan Reddy	Perform data preprocessing, feature engineering, and visualization of the flood dataset.	Data Analytics	G1
4	Sucharita Ganesuni	Design a responsive and user-friendly interface for the Flood Prediction System.	UI/UX	G1
5	Team	Integrate the trained machine learning model with Flask and prepare the application for deployment.	Deployment	G1

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
G1	Rising Waters – Flood Prediction Using Machine Learning	High	High	1	Yes
G2	Interactive Flood Monitoring Dashboard	Medium	Medium	2	No

G3	Flood-Prone Area Risk Analysis & Mapping	Medium	Medium	3	No
