

Demonstration of Proposed Features

Date	04 July 2026
Team ID	
Project Name	Rising Water
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Input Interface	Accepts flood-related parameters such as rainfall, water level, humidity, and temperature as input.	Implemented	Yes	Successfully demonstrated.
2	Data Validation	Validates user input before processing the prediction.	Implemented	Yes	Prevents invalid or missing input values.
3	Flood Risk Prediction	Predicts the flood risk using the trained Machine Learning model.	Implemented	Yes	Generates accurate flood prediction results.
4	Data Preprocessing	Cleans, scales, and preprocesses input data before prediction.	Implemented	Yes	Improves model accuracy and reliability.
5	Prediction Result Display	Displays the predicted flood risk level and safety recommendations on the result page.	Implemented	Yes	Results displayed instantly after prediction.
6	Responsive Web Interface	Provides a clean and user-friendly interface using HTML, CSS, Bootstrap, and Flask.	Implemented	Yes	Successfully demonstrated during testing.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
