

Project Demo Planning

Date	04 July 2026
Team ID	
Project Name	Rising Water
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project, explain the need for flood prediction, objectives, and the problem being addressed.	2	Kalluri Renuka (Team Lead)
2	Solution Overview	Explain the project architecture, dataset, technology stack, machine learning model, and overall workflow.	3	Bharath Chandra Yamarthi
3	Live Application Demonstration	Demonstrate the web application by entering flood-related parameters and displaying the flood prediction result.	5	P. Harshvardhan Reddy
4	Model & Technical Implementation	Explain data preprocessing, model training, evaluation, model serialization (<code>flood_model.pkl</code>), and Flask integration.	3	Sucharita Ganesuni
5	Results, Testing & Future Scope	Present testing results, prediction accuracy, project limitations, and future enhancements.	2	Kalluri Renuka
6	Questions & Discussion	Answer questions from the evaluators and conclude the demonstration.	2	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the motivation, objectives, and expected outcome of the Rising Waters project.
2	Solution Overview	Present the architecture, flood dataset, machine learning model, and technology stack.
3	Live Application Demonstration	Demonstrate user input, flood prediction, and result display using the Flask web application.
4	Model & Technical Explanation	Explain preprocessing, model training, evaluation metrics, and Flask integration.
5	Results & Future Scope	Present testing outcomes, discuss project limitations, and explain future enhancements such as real-time weather API integration.
6	Q&A Session	Answer evaluator questions and conclude the project presentation.
